

Engines and Transmissions

MLS FUEL PRE-FILTER APPROVAL

This is to advise that after extensive testing the centrifugal fuel pre-filter type MLS has been approved for use as a pre-filter with Iveco engines.

The appropriate sized filter must be chosen based on the maximum power output of the engine that will use this filter.

The different models for each engine size are as follows:

Engines up to 200 Hp FP 200

Engines up to 500 Hp FP 500

Filters fitted must be chosen and used within the sizing and installation guidelines set out by the manufacturer.
